## High Performance Slings

2

**Round Slings** are made with Multiple High tenacity yarns covered in a jacket. Polyester Round Slings are made with Polyester yarns and a seamless double Polyester or Nylon jacket.

Round Slings have a high strength to weight ratio, which provides an extremely flexible and light weight lifting sling with low elongation. Our Super Slings are a High Performance round sling available with Dyneema high performance yarns or EHP (Engineered Hybrid Power) high performance yarns. Covers for Super Slings are available in Nylon Double seamless cover, or Dyneema cover.
